NAGAPRASAD SALIAN

Hebri, Udupi 576112 | +91-7204582972 | saliannagaprasad22@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building and shipping full-stack web and mobile applications using Java, React.js, Node.js, FastAPI, and SQL/NoSQL databases. Designed RESTful APIs, implemented JSON Web Token (JWT) authentication, and delivered production-ready features through debugging, testing, and team collaboration. Familiar with Docker containerization. Seeking a Software Engineer role in enterprise application development, microservices, and cloud-native technologies.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, PHP, C, C++, .NET
- **Frameworks & Web:** React.js, React Native, Node.js, Express.js, FastAPI, Flask, REST APIs, WebSockets, HTML, CSS, Bootstrap, Tailwind CSS
- **Databases:** MySQL, MariaDB, MongoDB, Firebase
- **Cloud & DevOps:** Docker, Git, GitHub, MongoDB Atlas
- **Tools:** Android Studio, Postman
- **Concepts:** Object-Oriented Programming (OOP), Model-View-Controller (MVC), API Design, JWT Authentication, Debugging and Testing, Artificial Intelligence/Machine Learning (AI/ML)

PROFESSIONAL EXPERIENCE

Software Engineer | Lextria Research — Aug 2026 – Present

- Developed a standalone consultation booking module using ReactJs and FastAPI to manage service selection, appointment scheduling, and booking workflows.
- Implemented slot availability, temporary booking holds, and database unique constraints to prevent double bookings.
- Integrated Razorpay payment workflows with server-side pricing, payment verification, webhook handling, and automated refunds.
- Built client booking management features for cancellation and rescheduling, with configurable booking policies.
- Integrated Google Calendar API to create consultation events with Google Meet links and automated email notifications using Zoho SMTP.
- Developed an admin dashboard for daily booking management, employee assignment, holiday configuration, and booking cancellation.

Software Developer Intern | Ganglia Technologies Pvt Ltd. — Jan 2026 – Apr 2026

- Developed the mobile front end of the TripMacha travel application using React Native after analyzing product requirements.
- Built RESTful backend services with FastAPI for trip data, user preferences, and itinerary generation.
- Implemented dynamic itinerary generation driven by user inputs and real-time data.
- Integrated map-based route visualization and location tracking through external APIs; used Firebase for authentication, real-time data, and storage.
- Improved UI/UX across the home, profile, navigation, trips, and itinerary modules.
- Debugged, tested, and optimized performance to prepare the application for production release.

PROJECTS

Real-Time Chat Application | Tech: React, Node.js, Express, MongoDB, Socket.io, JWT, Tailwind CSS

- Built a full-stack real-time chat application using React, Node.js/Express, MongoDB, and Socket.io.
- Implemented secure JWT authentication with registration, login, and password reset.
- Added one-to-one messaging, notifications, online/offline presence, and unread indicators.
- Designed a responsive Tailwind CSS interface and deployed the database on MongoDB Atlas.

EDUCATION

Master of Computer Applications (MCA) | Manipal Institute of Technology, Manipal | CGPA: 7.80 2024 – 2026
Bachelor of Computer Applications (BCA) | Mahatma Gandhi Memorial College, Udupi | CGPA: 9.4 2021 – 2024
